Intent for REACH implementation

Attention chemical compliance departments:
Micrometals has been following the development of REACH, and working on how it will affect Micrometals and our customers since becoming aware of it in 2007. Micrometals continues to work with our supplier base to ensure that they are taking the necessary steps to ensure that the materials that they supply to Micrometals are in full compliance with the REACH regulation. With this initiative, we are confident that all of our products will continue to be delivered without any interruptions or issues for our customers.

Based on the regulations and documents, which support the regulations, the goods, which you purchase from Micrometals, meets the full definition of “articles” We do not deliver any products or packaging in the form of substances or preparations to our customers and none of our articles releases any substances. Due to this fact, there is no reason to assume that any of our European customers will need to act as an importer of our products produced outside of the European Union. If this should become necessary, we will nominate an “representative only” located in the EU to carry out the required registration of the substance that is imported, thereby relieving our customers of their registration obligations.

None of our articles contains any of the substances included in the list of materials contained in the SVHC (substances of very high concern). If at any time, any substance contained in our products is included in the list, We will inform our customers. Likewise, if it comes to our attention that a supplier fails to per-register a substance or preparation that is critical to production of our final products, our customers will be informed.

Please note that this statement only applies to materials manufactured and shipped by Micrometals and does not apply to any materials subsequently added, altered, converted or manufactured by others.

If you have any further questions regarding our REACH implementation commitment, please contact me at plopez@micrometals.com.

Best Regards,

Pedro Lopez
QA Coordinator
